Drop Cross-Segment Solutions image

Cross-Segment Solutions

Components and sub-systems used across rolling stock, industrial and power applications.

8 SUB-CATEGORIES

VIEW GROUP

Built for industrial buyers and project teams.

Five sectors where Dynalektric supplies OEMs, EPC contractors, utilities and procurement teams.

01

Railway & Traction

Onboard and trackside power for rolling stock OEMs and rail operators.

[VIEW APPLICATIONS →](#)

02

Renewable Sectors

Inverter-grade magnetics and grid-tie components for solar, wind and storage plants.

[VIEW APPLICATIONS →](#)

03

Power & Utilities

Distribution transformers, reactors and protective panels for utilities and EPC contractors.

[VIEW APPLICATIONS →](#)

04

Heavy Industries

Power and control packages for steel, cement, mining and process industries.

[VIEW APPLICATIONS →](#)

05

Material Handling & Warehousing

Chargers and power electronics for forklift, AGV and warehouse fleets.

[VIEW APPLICATIONS →](#)

06

Data Centers

Distribution, UPS interface and critical-load backup for data centre infrastructure.

[VIEW APPLICATIONS →](#)

Built for procurement and quality teams.

What we provide on every project: standards, documentation, in-house testing and export readiness. Useful for procurement, supplier quality and project engineering.

01

Documentation pack

QAP, GA drawings, BoM, datasheets, routine and type test reports, FAT protocol and material traceability on request.

02

Standards compliance

Designs and tests aligned with IEC 60076, IEC 61439, IEC 60068, IS 2026 and customer-specific specifications.

03

In-house testing

Routine testing on every unit. Type testing on-site for HV, partial discharge, temperature rise and impulse. Accredited external labs for type approvals.

Export readiness

Seaworthy packing, country of origin documentation, INCOTERMS support and CE marking pathway for European projects.

VENDOR REGISTRATION

Request our supplier qualification pack.

Company profile, ISO certificates, sample test reports, capability statement and reference list. Available on email request for procurement and SCM teams.

[Request pack →](#)

[View export support →](#)

05 / ENGINEERING AND NPD

Custom requirements engineered in-house.

Our engineering and new product development teams take a customer specification through feasibility, design, prototyping, validation and pilot production. One team, one process.

[View engineering capability →](#)

ENGINEERING FLOOR, PLACEHOLDER

Type-tested designs, full documentation, traceable processes.

Every product ships with routine and type test reports, QAP documentation and material traceability. Designs validated against IEC, IS and customer specifications.

07 / CASE STYLE REFERENCES

Buyer-grade examples, kept anonymous.

Indicative application references across rail, renewables, utilities, automation, material handling and data centres. Project names are not shown. Detailed references available under NDA on request.

RAILWAY EQUIPMENT APPLICATION

Auxiliary converter magnetics for metro rolling stock.

PRODUCT GROUP

Magnetics

BUYER NEED

Vibration-tolerant magnetics on a fixed delivery schedule, qualified for onboard duty cycles.

QUALITY OR DOCUMENTATION CONSIDERATION

Type tests for vibration, impulse and temperature rise. Documentation aligned with rolling stock acceptance requirements.

RENEWABLE ENERGY APPLICATION

Harmonic filter reactors for a utility-scale solar plant.

PRODUCT GROUP

Magnetics

BUYER NEED

Air-core reactor banks at the inverter station, validated for 25-year project life.

QUALITY OR DOCUMENTATION CONSIDERATION

Routine and type tests against IEC 60289 inputs. Documentation aligned with EPC handover. Subject to engineering review for site conditions.

POWER UTILITY APPLICATION

MV distribution transformers and substation panels.

PRODUCT GROUP

Magnetics + Control Panel Assemblies

BUYER NEED

Type-tested transformers and IEC 61439 distribution panels for an industrial substation upgrade.

QUALITY OR DOCUMENTATION CONSIDERATION

Routine tests on every unit. Type tests through accredited external lab. Third-party witness inspection at hold points.

INDUSTRIAL AUTOMATION APPLICATION

Drive cabinets and isolation transformers for a heavy machine builder.

PRODUCT GROUP

Control Panel Assemblies + Magnetics

BUYER NEED

Wired and tested cabinets with motor isolation, integrated with the customer drive platform.

QUALITY OR DOCUMENTATION CONSIDERATION

Stage inspection per customer QAP. FAT protocol agreed in advance. Material traceability supplied with dispatch.

MATERIAL HANDLING EQUIPMENT APPLICATION

High-frequency chargers for a multi-site forklift fleet.

PRODUCT GROUP

Power Electronics Systems

BUYER NEED

Opportunity charging across two battery chemistries with fleet management integration.

QUALITY OR DOCUMENTATION CONSIDERATION

Functional, efficiency and burn-in tests. Documentation aligned with destination market requirements, where applicable.

DATA CENTER POWER SUPPORT APPLICATION

K-rated isolation transformers and PDUs for an IT power chain.

PRODUCT GROUP

Magnetics + Control Panel Assemblies

BUYER NEED

Harmonic-tolerant isolation transformers and audit-ready PDUs for a critical-load deployment.

QUALITY OR DOCUMENTATION CONSIDERATION

K-factor verification on magnetics, where applicable. IEC 61439 routine tests on assemblies. Documentation prepared for audit and acceptance.

02 / ABOUT DYNALEKTRIC

Engineering-led electrical and electronics manufacturing.

Dynalektric designs and manufactures custom magnetics, transformers, control panels and power electronics for OEMs, EPC contractors and utilities. We engineer to specification, test in-house and document everything we ship.

COMPANY

An engineering-led manufacturer.

ESTABLISHED

1980, India

MARKETS SERVED

India, Europe, Middle East, Asia

BUYERS WE WORK WITH

OEMs, EPC contractors, utilities, railways, industrial automation companies, procurement and SCM teams.

We work as a long-term manufacturing partner. Our engineers take a customer specification, ask the right questions and supply a tested, documented solution on schedule.

From single prototype builds to repeat production lines, the approach is the same: every Dynalektric product is designed, wound, wired, tested and documented in-house. Engineering, manufacturing and quality work on one floor, on one team.

0+

YEARS

Of in-house engineering and manufacturing

0+

DESIGNS

Custom solutions delivered to specification

0+

MARKETS

Export destinations across three continents

● MANUFACTURING AND ENGINEERING CAPABILITY

Designed, wound, wired and tested in-house.

01

Design and development

In-house electrical, mechanical and thermal design. From concept and feasibility through prototype, validation and series production release.

02

Winding and assembly

Precision winding lines for magnetics and transformers. Vacuum pressure impregnation, oven curing and quality control at every stage.

03

Panel build and wiring

Type-tested control panel assemblies built to IEC 61439 with full mechanical, electrical and FAT documentation.

04

Routine and type testing

On-site test labs for high-voltage, partial discharge, temperature rise and impulse testing. Supplemented by accredited external partners.

05

Quality systems

Quality management aligned with ISO 9001, supported by customer-specific QAP frameworks and full material traceability on request.

06

Engineering support

Application engineering stays engaged after dispatch through commissioning, field issues and product-life support.

Standards, testing and documentation.

Designs validated against IEC, IS and region-specific requirements. Routine and type testing on every order. Documentation prepared for supplier qualification and project handover.

02 / PRODUCTS AND SOLUTIONS

Electrical and electronics products for industrial applications.

Transformers, reactors, control panel assemblies, MHE battery chargers, power electronics systems, busbars, cable harnessing, UPS and current sensors, engineered for railway, renewable, utility, heavy industry, material handling and data centre applications. Select a product group and a sub-category to see details.

01

PRODUCT GROUP 01

Magnetics

Transformers, reactors and magnetic components for industrial, utility and renewable installations.

OVERVIEW

LV and MV transformers, K-rated transformers and a full reactor family covering air-core, oil-cooled and de-tuned types. Engineered for power conversion, harmonic mitigation and reactive compensation across industrial, utility, traction and renewable applications.

Drop Magnetics image

SPECIFICATION PLACEHOLDERS FOR MAGNETICS

RATING RANGE 50 VA to 5 MVA	VOLTAGE CLASS up to 36 kV	INSULATION Class B, F or H	COOLING AN, AF, ONAN, OFAF
ENCLOSURE Indoor or outdoor IP rated	STANDARDS IEC 60076, IS 2026, IEC 60289		

Select a sub-category

01.1 LV Transformers Low-voltage distribution and isolation transformers SHOWING →	01.2 MV Transformers Cast resin and oil-filled, voltage classes up to 36 kV VIEW DETAILS →	01.3 K-Rated Transformers For non-linear and harmonic-rich load profiles VIEW DETAILS →
01.4 Air-Core Reactor Dry-type linear reactors for harmonic filtering and current limiting VIEW DETAILS →	01.5 Oil-Cooled Reactors Higher-rating reactors with oil cooling VIEW DETAILS →	01.6 De-tuned Reactor Reactor banks for capacitor de-tuning VIEW DETAILS →

LV Transformers

Low-voltage distribution and isolation transformers for industrial sub-distribution, control supply and signal isolation. Cast resin and dry-type options.

TYPICAL APPLICATIONS

- + Industrial sub-distribution
- + Control supply circuits
- + Signal and load isolation
- + Auxiliary supply for panels

SPECIFICATION PLACEHOLDERS

RATING RANGE 50 VA to 2.5 MVA	VOLTAGE CLASS up to 1.1 kV	INSULATION Class B, F or H	COOLING AN or AF
ENCLOSURE Indoor IP 21, outdoor up to IP 54	TESTS Routine, type tests where applicable	STANDARDS IEC 60076, IS 2026	CUSTOM OPTIONS Tap changers, shielding, low-loss core

03 / INNOVATION AND R&D PORTFOLIO

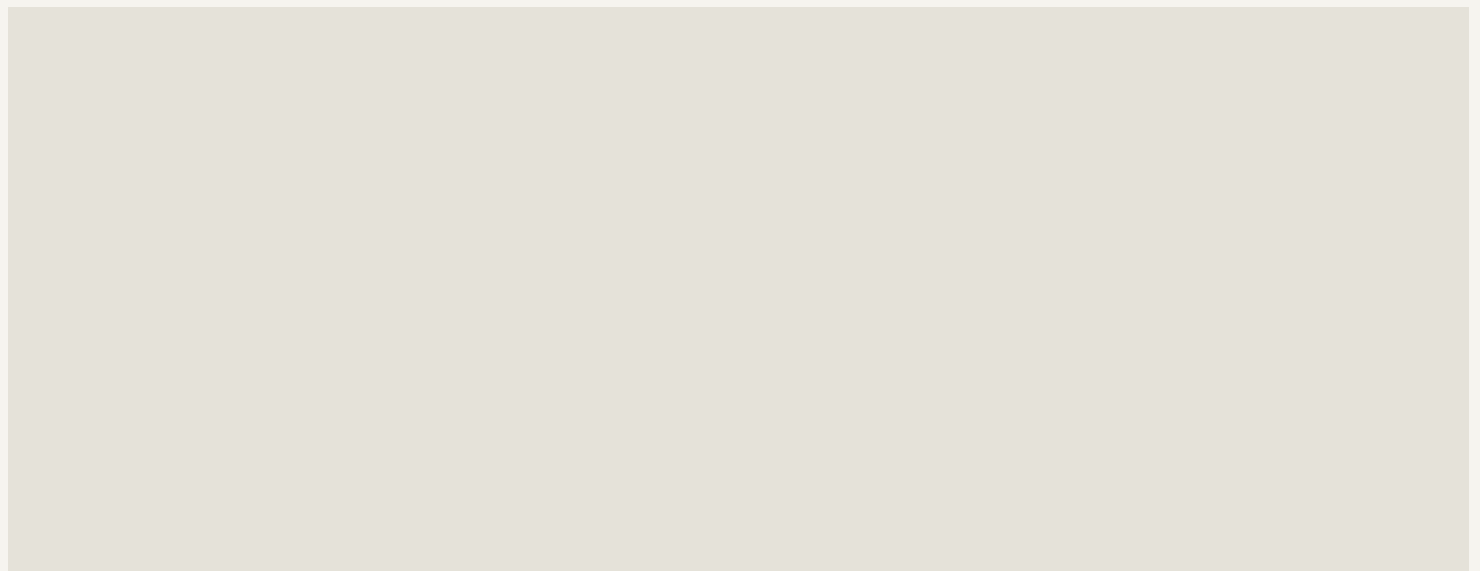

Innovation and R&D portfolio for custom power solutions.

Dynalektric is an engineering-led manufacturer. Our R&D portfolio covers traction, renewables, connected systems and integrated power modules. Each focus area carries products in active development, validation and series production.

● FOCUS AREAS

Four programmes, one engineering team.

Hover any focus area to see programme deliverables in active development.

Traction product development

Onboard converters, magnetics, panels and protection for rolling stock OEMs. Designed to IRS, RDSO and IEC requirements with type-test validation for vibration, thermal and electrical endurance.

- + Auxiliary converter magnetics
- + Locomotive and driver desk panels
- + Onboard protection and display units
- + Type-tested traction transformers

IN-HOUSE ENGINEERING

+

Renewable product development

Inverter-grade magnetics, harmonic filter reactors and grid-tie components for solar, wind and battery storage. Engineered for 25-year project life and high-cycle duty.

- + Solar inverter magnetics
- + Harmonic filter reactor banks
- + Grid-tie distribution transformers
- + Renewable substation panels

IN-HOUSE ENGINEERING

+

IOT and communication systems

Connected battery chargers, panel telemetry and onboard data acquisition. CAN, Modbus and RS485 interfaces with secure remote diagnostics for fleet and substation use.

- + Connected MHE chargers
- + Panel telemetry modules
- + Onboard data acquisition
- + Fleet and substation dashboards

IN-HOUSE ENGINEERING

+

Power modules and IPS

Integrated power supplies and OEM power modules. Application-specific rectifiers, inverters, DC-DC converters and DC-link assemblies, co-engineered with platform owners.

- + Integrated power supplies
- + Custom DC-DC modules
- + Rectifier and inverter blocks
- + Ruggedised power assemblies

IN-HOUSE ENGINEERING

Renewable EPC contractors, inverter OEMs, IPP owners and utilities.

QUALITY OR TESTING CONSIDERATION

Routine tests on every unit. Type tests for thermal endurance and partial discharge, where applicable. Documentation aligned with EPC handover requirements.

APPLICATION EXAMPLES

Solar inverter magnetics
String-level chokes
Wind converter components
Grid-tie transformers
Substation panels and protection

RELEVANT PRODUCT GROUPS

Magnetics →

Cross-Segment Solutions →

Submit RFQ →

Power & Utilities

Type-tested transformers, reactors, distribution panels, float and boost chargers and protection assemblies meeting IEC and IS requirements for distribution networks, industrial substations and captive power plants.

TYPICAL BUYER NEED

Utilities, T&D EPC contractors and industrial substation owners.

QUALITY OR TESTING CONSIDERATION

IEC 60076 and IEC 61439 routine tests. Type tests through accredited labs, where applicable. Third-party inspection ready.

APPLICATION EXAMPLES

MV distribution transformers
Harmonic filter reactors
Substation panels and PDUs
Float cum boost chargers
Auxiliary supply systems

Heavy Industries

Isolation transformers, MV switchgear interfaces, drive cabinets and PDUs for plant electrification. Engineered for heavy duty cycles and built to customer QAP frameworks.

TYPICAL BUYER NEED

Process plant owners, machine builders and EPC contractors for heavy industry.

QUALITY OR TESTING CONSIDERATION

Customer QAP and stage inspection. Routine tests on every assembly. Material traceability available on request.

APPLICATION EXAMPLES

Drive and motor control cabinets
Isolation transformers
Plant PDUs
Servo power supplies
Process automation panels

Material Handling & Warehousing

High-frequency chargers and battery management systems for 24 / 7 fleet operations. Built for opportunity charging, multi-chemistry compatibility and fleet management integration.

TYPICAL BUYER NEED

Material handling equipment OEMs, fleet operators and warehouse logistics providers.

QUALITY OR TESTING CONSIDERATION

Functional, efficiency and burn-in tests, where applicable. Conformance to chemistry-specific charging profiles. Optional third-party inspection.

APPLICATION EXAMPLES

Forklift fleet charging
AGV depots
Cold-chain warehousing
E-commerce fulfilment centres

RELEVANT PRODUCT GROUPS

Power Electronics Systems →

Cross-Segment Solutions →

Submit RFQ →

Data Centers

K-rated transformers, IT-grade PDUs, UPS units and busbar systems for data centre power chains. Supplied with documentation aligned to customer reliability and audit requirements.

TYPICAL BUYER NEED

Data centre operators, colocation providers and critical-power EPC contractors.

QUALITY OR TESTING CONSIDERATION

IEC 61439 routine tests on assemblies. K-factor verification on magnetics, where applicable. Documentation prepared for audit and acceptance.

APPLICATION EXAMPLES

K-rated isolation transformers
IT power distribution
UPS and battery backup
Busbar trunking
Auxiliary protection

Export-ready supply for global industrial buyers.

Documentation, inspection support and supply readiness for OEMs, EPCs, utilities, railways and industrial buyers. Final requirements are aligned based on product category, application and destination market.

[Submit RFQ →](#)

[Discuss export requirement](#)

DOCUMENTATION	Order-specific pack
INSPECTION	Routine, type, third-party
LOGISTICS	INCOTERMS based
ENGINEERING	Remote and on-site
STANDARDS	IEC, IS, IRS, buyer-specific

A structured approach to international supply.

Dynalektric supports export-focused requirements with structured documentation, testing coordination and product-specific compliance inputs. Final requirements are aligned based on product category, application and destination market.

We work with buyer procurement, quality and engineering teams to lock specifications, agree the QAP and inspection plan, and prepare the documentation pack required for despatch and on-site receipt.

● DOCUMENTATION SUPPORT

What we prepare for each export order.

Standard documents supplied with every export shipment. Custom requirements supported on request, based on product category and destination market.

01

IEC code reference

Importer Exporter Code on file.
Reference available on request for buyer onboarding.

02

Export-ready documentation

Standard export documentation pack prepared for each order, aligned to product category and destination market.

03

Certificate of origin

Country of origin certificate issued through the relevant chamber of commerce.

04

Product documentation pack

Datasheets, GA drawings, BoM and quality assurance plan provided per order.

05

Technical datasheets

Application-specific datasheets per sub-category. Available on email request.

06

Compliance inputs

Product-specific compliance inputs based on category and destination market, where applicable.

07

Test certificates

Routine and type test certificates supplied with each shipment, where applicable.

08

Dispatch documentation

Packing list, commercial invoice and dispatch paperwork prepared per agreed INCOTERMS.

Built around your inspection plan.

Inspection and testing aligned with the approved QAP. Scope adapts to product category, applicable standards and the buyer's qualification programme.

01

FAT support

Factory acceptance testing coordinated with the buyer or buyer-nominated agency.

02

Routine test support

Routine electrical and functional tests recorded against the approved QAP.

03

Type-test availability

Type-test access on-site and through accredited external labs, where applicable.

04

Third-party inspection

Inspection readiness for buyer-appointed third parties and certification bodies.

05

Inspection checkpoints

Pre-defined hold and witness points across manufacturing and testing stages.

06

Calibration support

Calibration records for measurement instruments used during routine and type testing.

07

Quality documentation pack

Consolidated quality documentation provided with dispatch, based on product category.

From dispatch floor to destination port.

Packing, labelling and logistics documentation prepared for international shipment, with destination-specific support where applicable.

01

Export packaging

Seaworthy and fumigated packaging prepared per product category and destination market.

02

Traceability

Serial and batch traceability maintained from raw material to dispatch.

03

Dispatch coordination

Coordination with buyer-nominated freight forwarders or in-house logistics partners.

04

Product identification

Nameplate, labelling and marking per buyer requirements and destination standards.

05

Logistics documentation

Documentation prepared for INCOTERMS, port handling and inland transport, where applicable.

06

Destination-specific support

Region-specific labelling, language and documentation support, where applicable.

● ENGINEERING AND COMMUNICATION SUPPORT

Technical support for procurement and engineering teams.

A point of contact in the engineering team for every active enquiry and order. Available across order, manufacturing, dispatch and post-supply phases.

01

Remote engineering discussions

Video and audio sessions with the engineering team for specification review.

02

Technical clarifications

Written responses to buyer queries during quotation, order and execution stages.

03

Application review

Joint application review for non-standard or special-purpose requirements.

04

Documentation discussion

Walk-through of datasheets, drawings, QAP and test protocols on request.

05

Standards alignment

Discussion of applicable IEC, IS, IRS and customer-specific standards.

Long-term supply support

Engineering support across repeat orders, product life and field clarifications.

● PRODUCT CATEGORY EXPORT VIEW

Export readiness, by product group.

Documentation needs, testing support and typical applications for each Dynalektric product group. Select a group to expand.

PRODUCT GROUP 01

Magnetics

DOCUMENTATION

- + Datasheets per rating
- + GA drawings, BoM, QAP
- + Type and routine test reports
- + Material traceability on request

APPLICATION EXAMPLES

- + Substations and renewable plants
- + Traction transformers and reactors
- + Harmonic mitigation

TESTING AND INSPECTION

- + Routine and type tests
- + Temperature rise and impulse, where applicable
- + Third-party inspection ready
